
(a) A, C: well profiles, $r = 0.05$
$c = 40$
$c = 90$
$c = 60$
(b) B′: $\kappa(x)^2 = \kappa_0^2 + \gamma\, b(x)$
(c) B, C: $K(x) = \exp(\beta\, b(x))$
$n_x = 32$, $h = 1/33$
(d): one draw per truth,
same white noise (seed 20261017),
shared colour scale
(d) reference
(d) A wells
(d) B lens
(d) C wells + lens
